EXPERIENCE

Associate Consultant | Jasper Report Developer   September 2021 – Present
Capgemini   *Pune / INDIA*

- Engaged with two projects at a time. One of them is Fund migration project where need to develop Jasper and BIRT report as per client's business need. And another one is the SAP to Jasper migrations Phase - II.

- Worked on reports with multiple crosstabs and complex design challenges.

- Worked with a team of 7 members and fixed bugs in the reports. Also helped team members to resolve issues in query side as well in report design part, which increases the delivery count in production.

- Worked on the enhancement of delivered report as per business need. Customized the query and did cosmetic changes in the reports as per client's need.

- Migrated SAP Bo reports into Jaspersoft and integrated Jasper reports in a way so that it can be used in client's Internal platform. Worked on following migration works 1) Webi Intelligence to Jasper Reports 2) Desktop Intelligence to Jasper Reports

- Developed around 1500 simple to very complex reports as a team, and **more than 70 complex reports as an individual**. Designed highly complex Jasper report with multiple queries, complex variables and expressions.

- Worked on medium and **complex Oracle Sql queries** and modified them to use in Jasper reports which **simplifies Jasper report structure around 30% than normal report design**.

- Used JSON stracture to use SQL output data as cache and distributed the data inside the reports which **increases report performance around 90%**.

- **Trained and mentored 6 people on Jaspersoft studio.** And also worked with a team of 56 member to complete the project

- Used JIRA to maintain the workflow and also used GitHub to deploy the code in client's server.
